

Solenoid

MSV-13-11, a Solenoid especially designed for military applications, with a mechanical stroke of up to 7.6 mm and able to put into motion loads of up to 13 kg. The MSV-13-11 is also compatible for industrial applications, where a need exists for putting heavy loads into motion.

Specification

Parameter	Unit	Value	Tolerance
Operating voltage	V DC	15 - 30	-
Air gap corresponding force (at 15 Volt)	kg	13.66	min
Coil resistance	Ohm	2.3	± 10%
Mechanical stroke	mm	7.6	± 0.5
Operating temperature range	deg C	-53°C - +53°C	-
Weight	gr	2120	± 50

Electrical connection: MS 27144 - 2 Socket contact, MS 27142 - 3 Pin contact
